

# 4<sup>TH</sup> PROJECT RISK FORUM

## Risk Powers Strategy

This edition of the project risk forum will explore how risk management enables successful strategy initiatives and implementation. We will be discussing strategy implementation and risks according to different innovation types and invite people from different organizations and levels.

# RISK POWERS STRATEGY

**Date:** November 2nd 2018

**Theme:** Risk Powers Strategy

**Location:** DTU Lyngby Campus, Building 101, Room S01

**Fee:** No charge

This edition of the project risk forum will explore how risk management enables successful strategy initiatives and implementation. We will be discussing strategy implementation and risks according to different innovation types and invite people from different organizations and levels. Doing strategy is risky – new technologies, new markets, and new internal capabilities are created. Effective project risk management allows strategy projects to manage these types of uncertainty, and helps leadership teams deliver. On the other hand, failure to manage strategy implementation risks causes significant financial losses – directly and as opportunity costs.

## Program

- 09.00 Registration & light breakfast snacks
- 10.00 Welcome & introduction
- 10.05 Intro to Strategy Portfolio Framework by Josef Oehmen

- 15.30 Wrap-up
- 16.00 End of day

# MANAGING UNCERTAINTY IS THE KEY TO SUCCESS

For organisations that deal with large scale engineering projects, uncertainty is the challenge that permeates projects, portfolio and strategy.

## Project risk forum

Discover the value risk management can create and be part of an actionable discussion and insight session with other industry practitioners. We bring people together that are interested in improving project risk management. The focus of this edition is to explore the different needs stakeholders have in relation to risk management at different levels of the organisation and how they can be implemented in the project and risk management activities.

Participatory forum to bring together people interested in risk management

Discussing best practices, challenges & state of the art research

Key notes and workshops

Creating actionable insights for project risk management

Engaging industry practitioners

Addressing a new topic every 6 months
